MXVI design+online

elegant... simple.

To be different & succeed in life you need to do DIFFERENT THINGS, to do the opposite of EVERYONE ELSE

website & graphic design

balance

symmetry or asymmetry, radial or crystallographic (mosaic)

contrast

interesting designs
stand out by placing
opposites near each other
light + dark
sharp + round

hierarchy

elements placed in
order of importance
determines what path
the eye will take in
an optimal design

web development

Lines of code, namely HTML & CSS, are written
to design the look & feel of a website;
graphic designers create images for use on the web.
Modern websites also cater to various device form
factors including screen size & resolution.
Web engineers address issues such as usability,
user experience, typography & eligibility
as well as interface design & quality of content.

adaptibility

| design | interface | usability | content |

| hosting | domain | registration |
